Subject: SEC: UNCLASSIFIED:-IT WORKS

Hi Hellweg,

Just a quick note to say thankyou for a truly excellent product, yesterday I was involved in an incident in Iraq that put your product to the ultimate test, and I assure you that I wouldn't be here to write this if it wasn't for your vest. Although my injuries are to the extent that I can't do my job at the moment, it was your vest that took the brunt of the blast I was involved in. I was less than 10 metres from it and the bomb although big enough to shred the car it was in into an unrecognizable twist of metal, I came away from the blast with relatively minor damage to my left shoulder and arm, your vest on the other hand shows the scars of dozens of strikes and you can feel the pieces of frag imbedded in the material.

The ballistic plate also shows some very serious strikes and although the plate is now fractured and dented in numerous places it too has done what it was supposed to, in all I'm one lucky soldier and have companies like yours to thank for providing first rate equipment to defence personnel out there on the front line.

cheers for now

Tpr Linton Harris
